

Supp data 5: Analysis of fully versus partially sprayed huts per month for SumiShield sprayed huts.

Comparisons are made across each row with the fully sprayed huts as the reference category for each row.

Numbers in parentheses for mortality and risk ratios represent the 95% confidence intervals.

	SS Full Unadjusted % Mortality (95% CI)	SS BH+C Unadjusted % Mortality (95% CI)	Risk Ratio	P value	SS TH+C Unadjusted % Mortality (95% CI)	Risk Ratio	P value
